RATHLIN 70 70LR INTERNAL RECYCLING BIN

Unicorn Urban

The 70L Rathlin Internal Recycling Bin is an innovative solution to optimising internal waste management. Discreet and sympathetically designed, the construction makes it cost effective and practical. The modular design enables users to create banks perfectly suited to complement any environment and waste stream.

Manufactured from Zintec steel, the Rathlin bin undergoes a multi-stage degreasing and washing process giving it the superior durability, finish and protection required for continuous use in any indoor space. As standard, stainless steel hinges and locking mechanisms significantly improve the bin's access and servicing. Further improving its attractiveness and purpose, a range of options enable customers to create a bespoke bin that supports the environment and organisational objectives.
