

STRANGFORD 160LR STREET LITTER BIN

Unicorn Urban

The Strangford 160L Street Litter Bin incorporates 2 separate 80L liner with 4 apertures enabling waste to be separated into general and recyclable. The 160L Litter Bin offers standard and optional features that enable the bins to be customised for specific locations and various applications whilst still retaining high quality design and specification.

The Strangford Range is manufactured incorporating Zintec Steel, using a three stage degreasing and washing process. Stainless Steel hinges, locks and strike plates add protection and result in a robust quality product. Sympathetic design and use of materials result in a bin that not only fits into its surrounding environment but also has minimal impact on the environment. Our range of bins benefit from high material and build specification.
